COMPANY PROFILE

Four Way Engineers has reached a landmark in terms of services provided to the industry. Today, we have engineers and welders who are trained to handle a wide variety of installations and fabrication work.

- **Turnkey projects (Civil & Mechanical)**
- **Four Way Engineers has production unit for gas equipments and manifolds.**
- **Annual Maintenance Contracts for Fire Safety/Hydrant Line/Gas Manifold & other services.**

The growth of the company is primarily because of three features **QUALITY, SERVICE AND SAFETY.**

PRODUCTS AND SERVICES

GAS PIPING (Ar, CO2,He,N2,O2,H2, D.A. and other Gases) :-

The industry today needs SYSTEMS, which can either contribute to increased production with the existing infrastructure or cost reduction without additional investments or both.
GEPL identified this need and promoted “gas piping” for industrial applications.

GASMANIFOLD :-

To reduce manpower and cylinder movement on floor, the best way is to centralise the system. For centralising the system, we first study the customer requirement and then propose a complete solution. We provide manifold for all gases. This is a **SAFE** way to handle gases.

LPG MANIFOLD AND PIPELINE :-

Four Way engineer is doing complete installation of manifold system after studying you requirement of LPG and pipeline for supply.
